

In the game, there are invisible blocks in the air which, if you hit them, will take you a few levels ahead. I have pictures of all locations of warp blocks. The place where the invisible block is, is marked with yellow.

These screenshots show the location of the warp blocks:

- Level 3 to level 6
- Level 6 to level 9
- Level 8 to level 11
- Level 17 to level 20
- Level 19 to level 22
- Level 22 to level 25
- Level 25 to level 28
- Level 28 to level 31

This is how you warp using the warp blocks.

---

First, locate the warp block (next page):

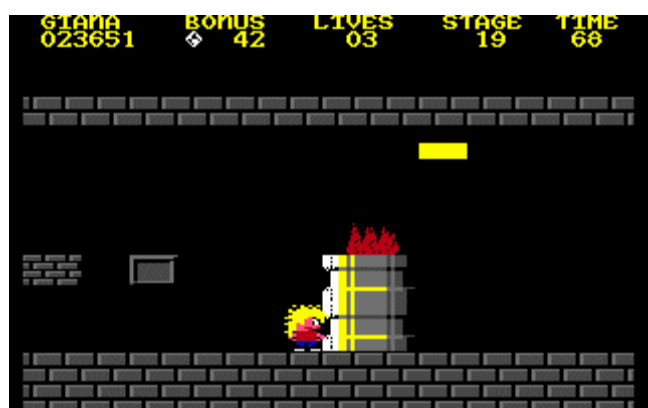

Then, position yourself under the (invisible) block:

Jump up, and the block will appear:

There are also ways to warp to the next level. This cheat works everywhere on all levels except the last one(no 33), but not when you're below the ground in a bonus pit.

**The level warp cheat in four different ways:**

1. Press and hold the following keys: Left Arrow+CTRL+RUN/STOP+Z+X.
2. Hold down SHIFT(or press SHIFT/LOCK) while on the inactive joystick, press down-left and push the button.
3. Press the keys A+R+M+I+N at once (for Armin Gessert). A+R+M+N or A+M+I+N will also do the trick.
4. Press the keys M+A+N+R at once (for Manfred Trenz).
5. Press the keys Z+X+A+W at once.
